

Assessment Focus

Suppose you want to find out how your classmates spend their money. Write a question you could use to survey your classmates.

- Conduct the survey and record in a frequency table
- Graph the data. Justify the choice of graph
- What do most of your classmates spend their money on?
- Use the graph to write 3 other things you know about how your classmates spend their money.

What do you like to spend your money on?

Spending Options

I chose to use a bar graph because I find a bar graph easier to read over a pie graph.

Most of my classmates spend their money on clothing.

1. There are a lot of other things that people like to spend their money on.
2. Not very many people spend their money on candy.
3. The second most popular thing that students spend their money on is video games.
